Smart Camera
FHV7 Series

OMRON

Draw advanced inspection closer within your reach

A new camera with advanced image processing functions

DESIGN AWARD 2020

GOOD DESIGN AWARD 2019

LEAP AWARDS Winner

Find out about Awards

sysmac always in control

The functionality and speed that your production site demands packed in an all-in-one device

The FHV7 Smart Camera is an all-in-one camera with the functionalities of the high-spec vision system FH Series packed in its compact, robust body that is easy to deploy.
It provides almost all inspection and measurement functions of the FH Series, and allows for easier image inspections of matching quality, even in processes where inspection had previously been omitted due to restrictions in durability, space, and system deployment time.

Integrated controller structure

Smart camera

FHV7 Series

Difficulties in processing product variation

Flexibly accommodates object changes

P.6

Harsh installation environments

A robust all-in-one body that makes it easy to install

P.4

Urgent need to improve manufacturing quality

Excellent productivity performance

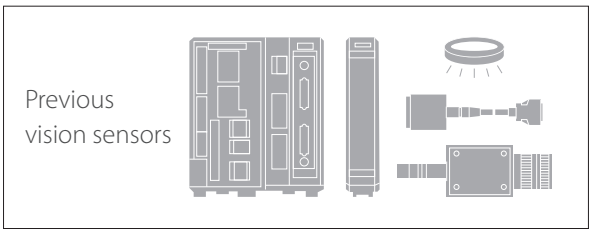
P.8

A robust all-in-one body that makes it easy to install

Installable anywhere

Integrated camera/controller structure

Integrates everything you need for image processing.
All-in-one structure includes not only the controller but the lens and lights as well, allowing you to easily attach it wherever you want additional inspections or measurements, without having to worry about control panel space.



Easy-to-replace modular structure

Lens and lights are available as modules.
Easily replaceable in the event of any mechanical failures or inspection specification changes.

Robust structure

IP67 waterproof structure

IP67 compatible to allow use in wet conditions, such as regular wash-downs at the sites where the cameras are installed.

Captive screws

Replaceable modules use captive screws, to prevent problems caused by the screws falling into the production line, etc.

Replaceable covers

The light cover and optical filter are easy to remove and replace, so you don't need a protective cover, etc., against dirt.

Dirty cover filters can be removed separately for replacement

High scalability

External lights supported

The FLV and FL Series have a broad lineup of more than 150 models, and they can easily be attached as external lights to FHV7 Smart Cameras. By connecting the lighting controller, you can, from FHV7's setting window, easily adjust the light emission intensity and set light emissions to synchronize with the release of the shutter.

Flexibly accommodates object changes

Multi-color Light

Accommodates color variations

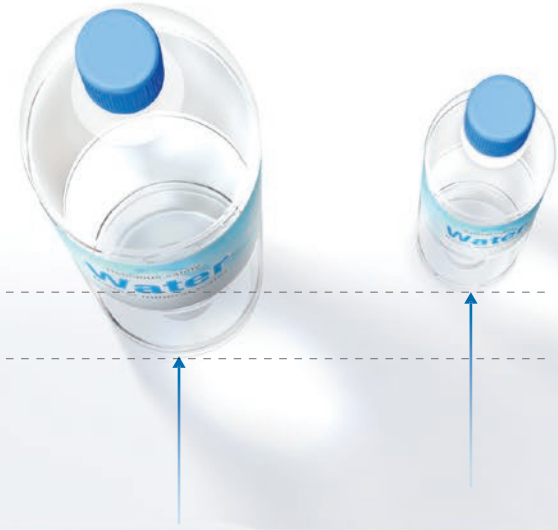
Multi-color light provides a quick solution to the issue of measuring different colors. For example, objects with variously colored packages on a production line are properly measured with the light that changes its illumination color to fit each object. When the product design is changed or a new models is added, you can simply change a parameter instead of replacing or fine-tuning lights. The production line is always ready for a wider variety of product.

Autofocus Lens

Accommodates size variations

The autofocus lens covers a focal length range from 59 mm to 2,000 mm[*1]. Even when products in different sizes are produced, the focus range can be changed easily by parameters. [*2] This feature eliminates mechanical operation for changeover during product replacement, leading to a simpler system with higher productivity.

*1. Differs depending on the lens type. See the optical chart on page 50 for details.
*2. Set focuses for different product heights in advance and switch between them when you perform a changeover.



Best-in-class resolution[*3]: 12 megapixels

Location variation

The image sensor with a 12 megapixels enables high-precision inspections for wider areas. This eliminates the need for installing multiple cameras or a mechanism to move a camera to capture different inspection points on different models on the same production line.

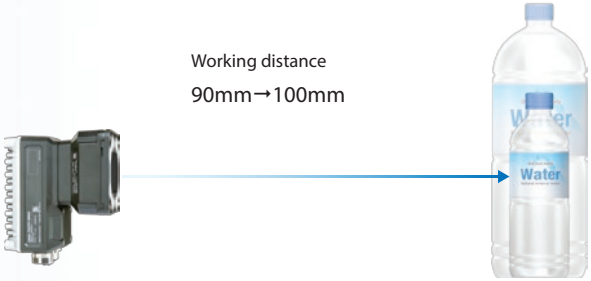
*3. Based on Omron investigation in October 2018.

When inspecting products of different colors

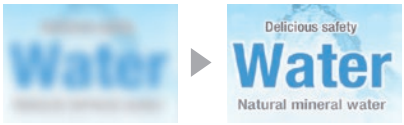
As a product has more color options, some of the colors may cause low contrast under a single color illumination. The multi-color illumination allows switching colors for different product color options, ensuring stable inspections.

When inspecting products of different sizes

When inspecting products such as plastic bottles that come in different sizes, you can perform a changeover only by switching the setting of the autofocus lens. The autofocus lens does not need the mechanism for moving the camera.

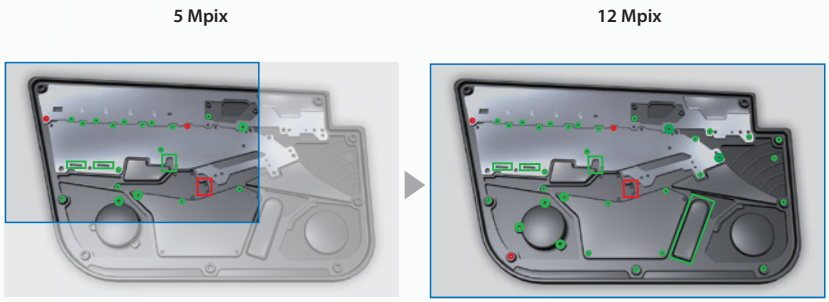


Always in focus even when the focal length changes



Expanding the range of parts inspection

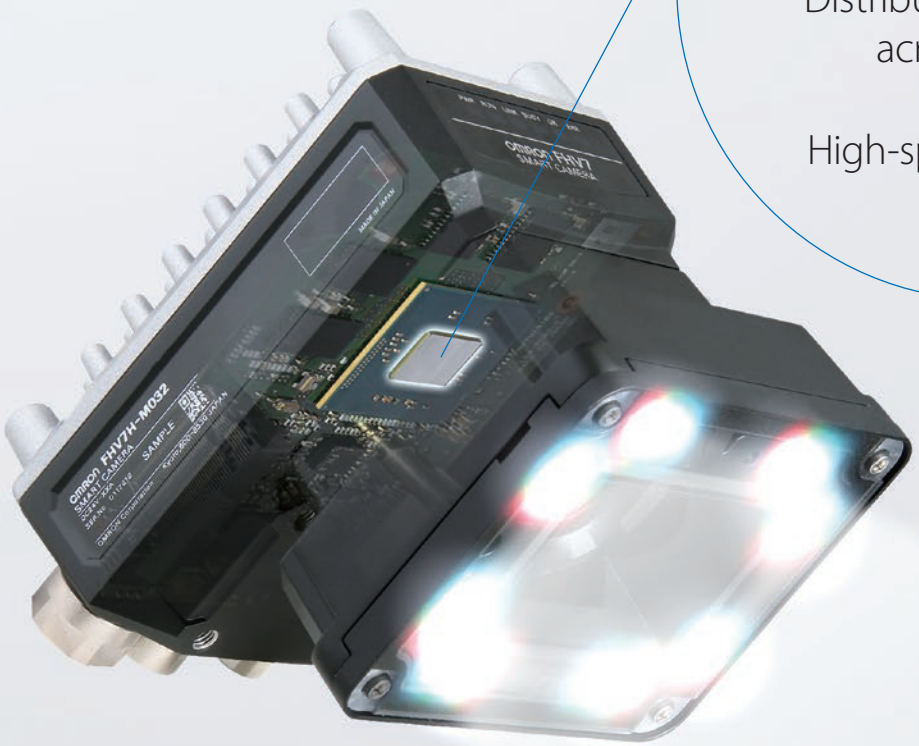
Accurate and extensive inspection of parts mounting points on different automobile models is enabled without moving cameras.



Excellent productivity performance

Best-in-class speed*1

Image capture
Maximum speed 2.3 ms
×
Distributed processing
across 2 cores
×
High-speed algorithm

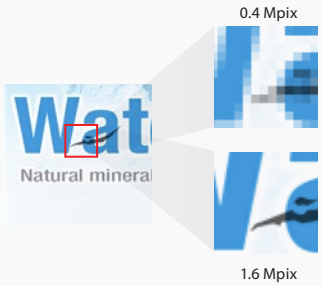


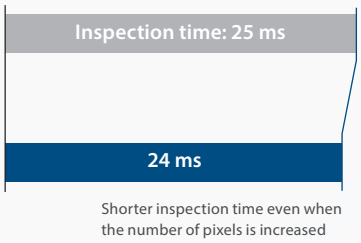
High-speed processing

The all-in-one FHV7 Smart Camera is packed with capabilities garnered through the FH Series.
Its high performance, comparable to a dedicated image processing system, supports advanced applications as well.

Clear images facilitate inspection

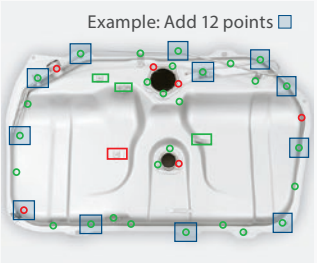
The FHV7 Smart Camera can measure 1.6 megapixels in 24 ms.
It can perform high-resolution inspections without compromising speed capabilities, and can be used in places where image processing systems are currently deployed.

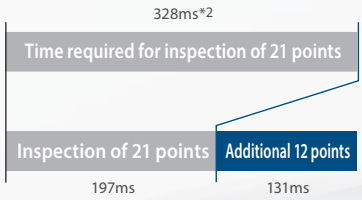




More inspection points

FHV7's high processing performance enables you to easily conduct inspections equivalent to an image processing system. It is optimal for multipoint inspections that would significantly compromise speed when conducted with traditional smart cameras.

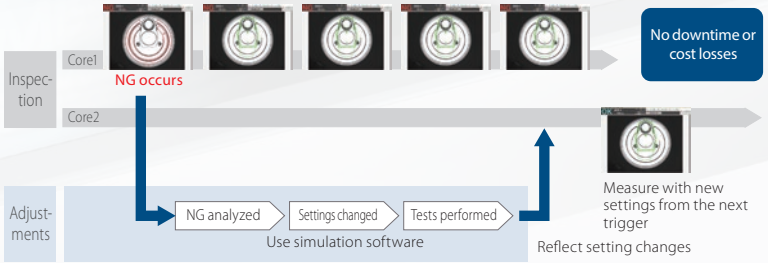




Green : Inspection passed, **Red** : Inspection failed

Settings can be adjusted with zero downtime

Measured values may change gradually due to workpiece variation or changes in external circumstance. Even in such cases, distributed processing across 2 cores allows you to perform cause analysis and setting adjustments as you make measurements. You can eliminate downtime and visual inspection of uninspected items.



*1. Based on Omron investigation in October 2018.
*2. Sample comparison to inspection time using vision sensors installed in customer's machine. Based on Omron investigation in October 2018

Application Examples

Traceability and serial number management

The FHV7 Smart Camera is suitable for applications in which inspection results and images are managed by product serial numbers.

Stable reading regardless of printing quality

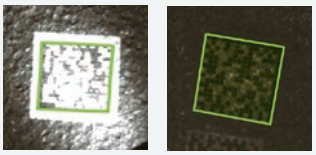
2D Code II delivers powerful code reading

The dedicated algorithm for stable 2D code reading under adverse conditions is implemented. Data based on the print quality specifications can be output, which contributes to stable printing.

Print Quality Grading Function

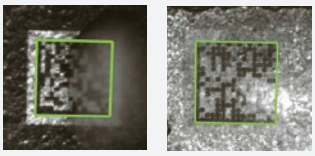
- ISO/IEC 15415
- ISO/IEC TR29158

Changing ambient brightness



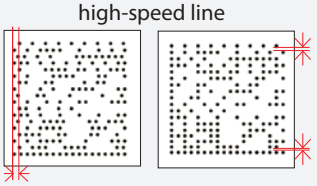
Chips due to reflection | Low contrast

After processing/washing



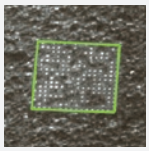
Waterdrops and dirt | Scratched damage

Poor printing quality in high-speed line



Variations in start positions | Uneven line spacing

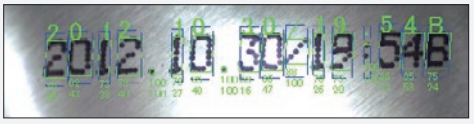
Poor printing quality on coarse surface



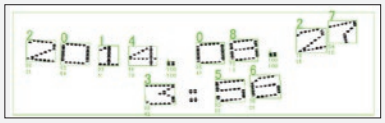
Molding variations of forged object

Stable reading of difficult-to-read characters (OCR)

Printed characters can be too close to each other, and characters can be printed on curved surfaces. Even in these cases, stable reading is possible. Also plus signs can be read.



Touching characters



Curved character strings

Plus signs NEW

Easy installation with built-in dictionary

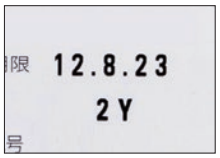
Many previous character reading methods required dictionary setup before usage, which was a tedious step. The built-in dictionary developed through our long and rich experiences on FA sites includes a variety of fonts and possible character variations, eliminating the need of dictionary setup. You can also add non-conventional characters when special fonts are read.

Characters from most printers can be read, including dot and impact printers.

Approx. 80 fonts are supported

Hot printer

Inkjet printer



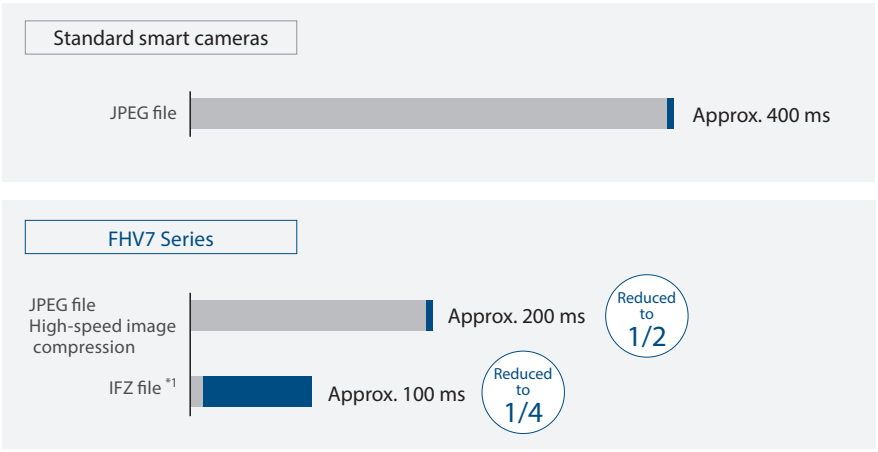
Thermal printer

Laser marker

Evidence management

High-speed image storage and image compression

Image data is so large that conventional controllers could not store all images due to limited storage time and storage capacity. The FHV7 Smart Camera has algorithms and hardware that can save images in Omron formats and compress image data at high speed, enabling all images to be stored to meet increasing needs in quality control.



Compression time
Storage time

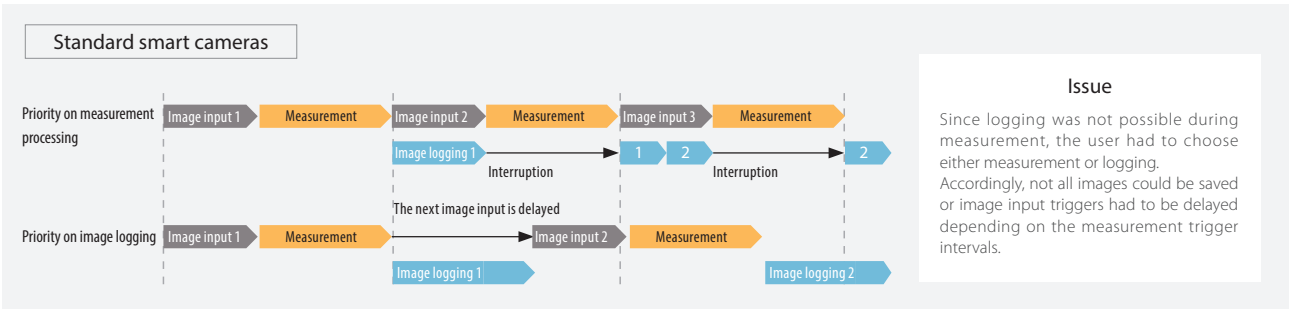
The times in the figure on the left are provided for reference only and their accuracy cannot be guaranteed. They are measured under the following conditions:
- FHV7H-M050 Smart Camera
- 5 Mpix monochrome images
- Size of converted JPEG file: 0.1 MB
- Ethernet

*1. Omron's own image file format

Images are saved even during measurements

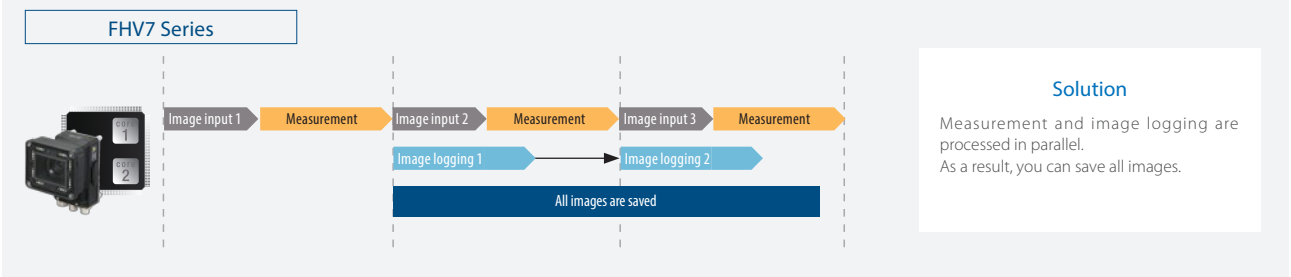
Distributed processing across 2 cores allows the CPU to perform parallel processing of measurements and image logging. With connection to a high-speed, large-capacity NAS, all images on the high-speed line can be saved, which was previously difficult. *2
Trend analysis of all saved images quickly isolates errors and facilitates countermeasures.

*2. All images can be saved under the following conditions:
- One 0.4 Mpix camera
- Measurement time of 30 ms
- JPEG file
- Images can be saved continuously for approx. 380 days when a 3 TB NAS is used (based on 8 hours of operation a day)



Issue

Since logging was not possible during measurement, the user had to choose either measurement or logging.
Accordingly, not all images could be saved or image input triggers had to be delayed depending on the measurement trigger intervals.



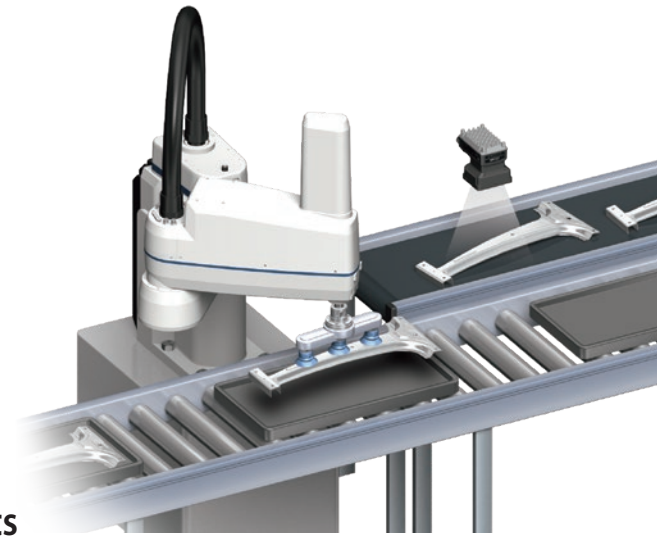
Solution

Measurement and image logging are processed in parallel.
As a result, you can save all images.

Application Examples

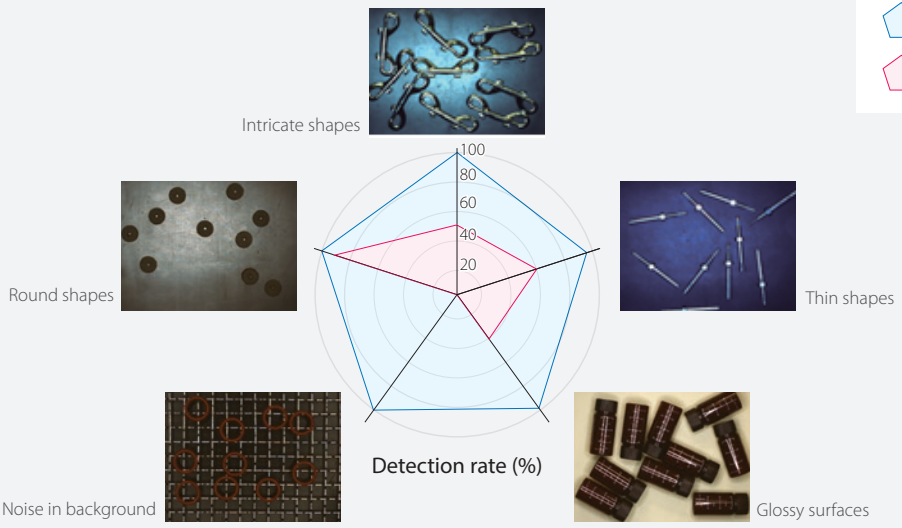
Pick and place

The FHV7 Smart Camera can be combined with robots for picking and assembling applications.



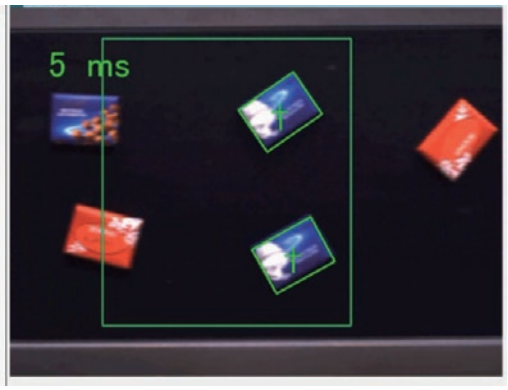
Shape Search III stably detects all types of objects

Stable position detection is performed regardless of shape, material, or background.



Sorting mixed models

Different types of the searched objects can be sorted.



Think & See, the core technology of Shape Search III

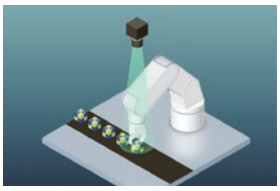
"Think & See" is Omron's powerful core technology for image sensing. Omron is continuously developing technologies to measure, detect, or identify the positions, orientations, shapes, materials, colors, status, or attributes of things, people, vehicles, or other objects faster, more precisely, and more easily than the human eye under various conditions.

See the details of Think & See.

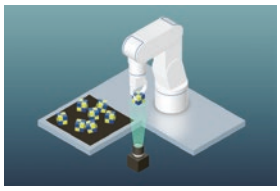
https://www.fa.omron.co.jp/tse

Easy output to major robot manufacturers' devices

The dialog boxes for the FHV7 Smart Camera and the programs for various vendors' robots greatly reduce the set-up time for robot applications. Refer to the system configuration diagram (P. 22) for connection details.



Pick



Offset compensation

Place

3-step easy setting

Verified robot communication programs and flowcharts required for robot applications are provided. You don't need to design communications and create a flowchart to set up a robot application.

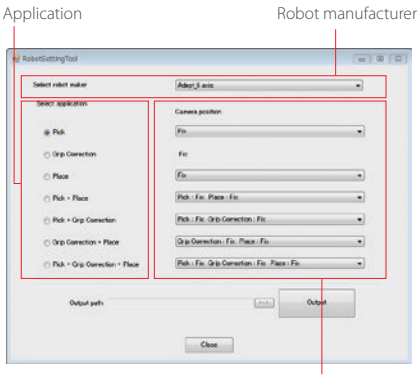
STEP 1

Obtain robot program and flowchart

Just a few clicks in Robot Setting Tool

Select 3 items to obtain the communication program and flowchart you need.

You can download the Robot Setting Tool from the following URL:
http://www.ia.omron.com/fhv

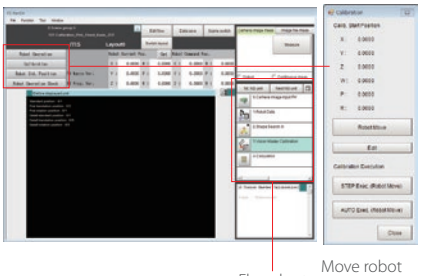


STEP 2

Calibrate

Move robot for calibration from the FHV7 Series

The obtained flowchart can be used to move the robot for calibration from the FHV7 Smart Camera. There is no need to create a program for robot calibration.

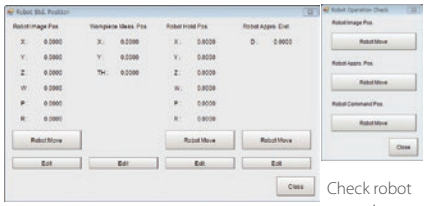


STEP 3

Check operations

Set up and check application from the FHV7 Series

Set the coordinates of the robot and check robot operations using the dialog boxes.



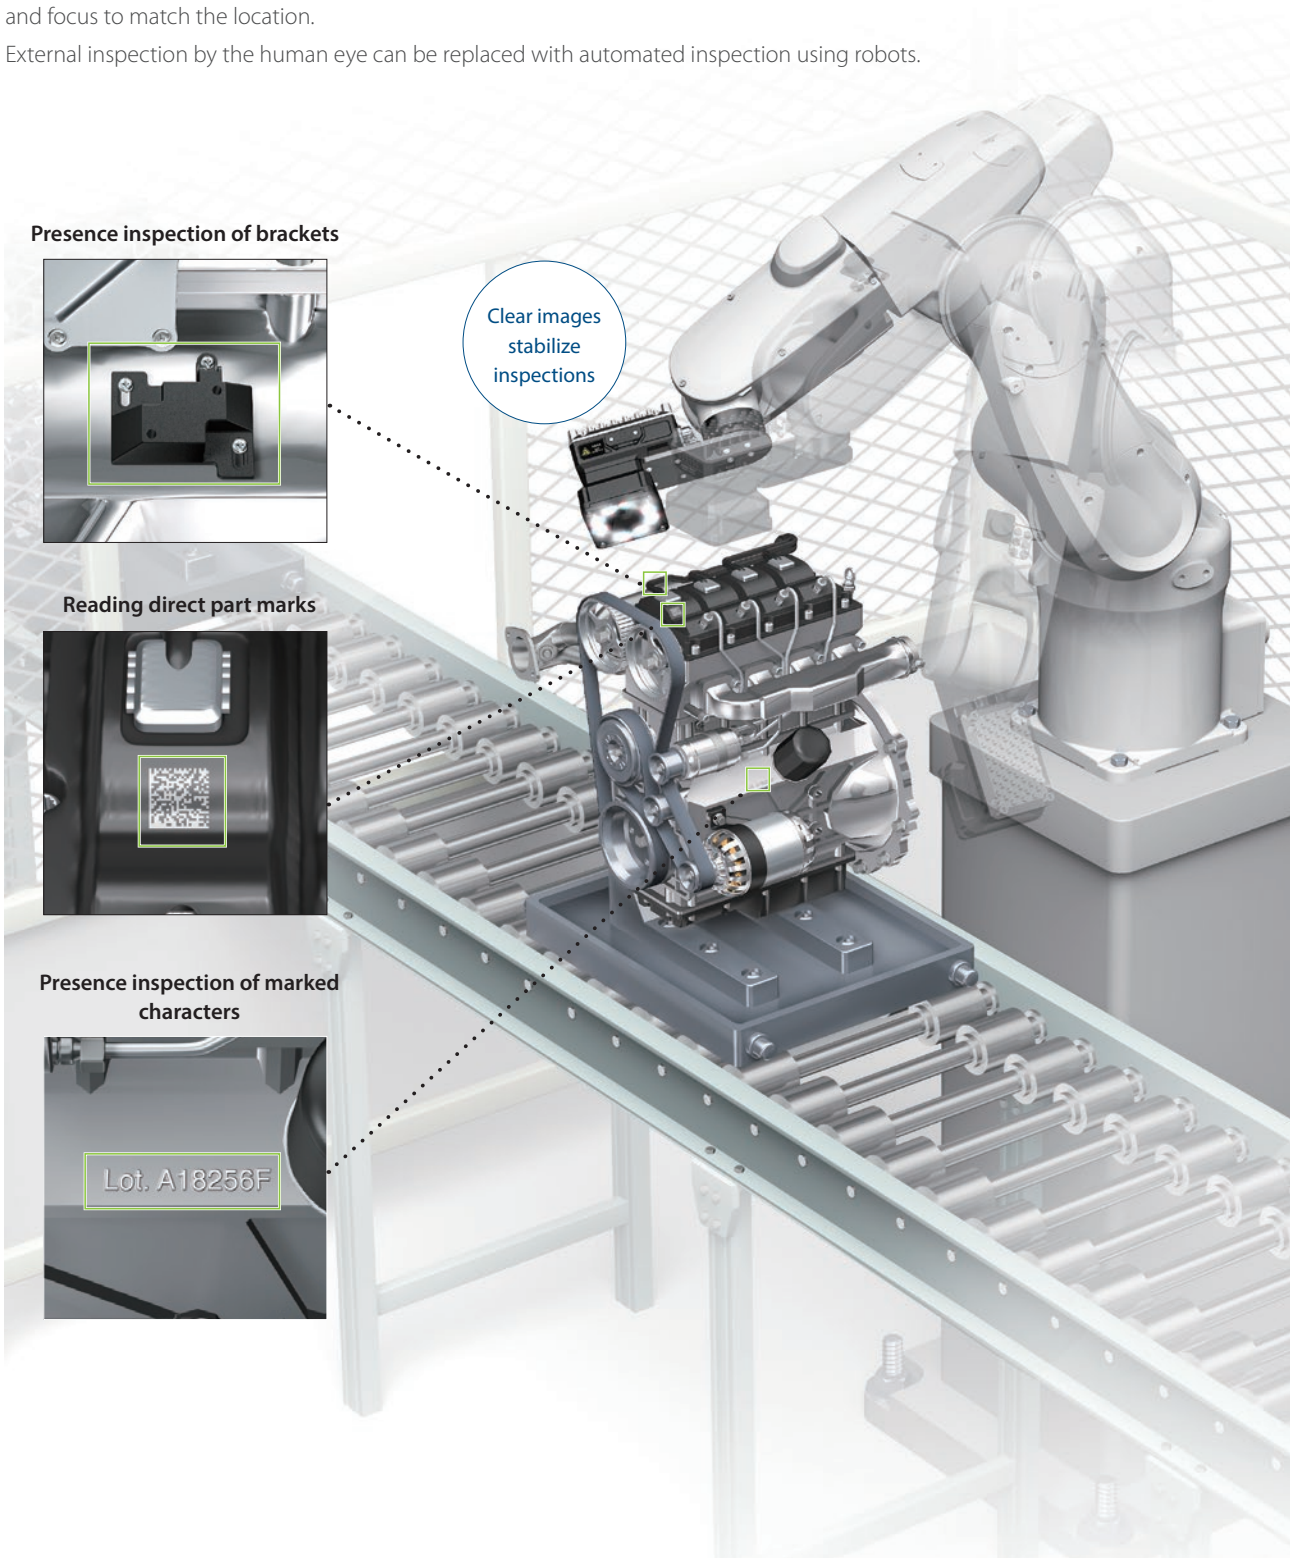
Application Examples

Flexible multipoint inspection using robots

The FHV7 Smart Camera can be installed on robot arms to inspect objects from multiple directions.

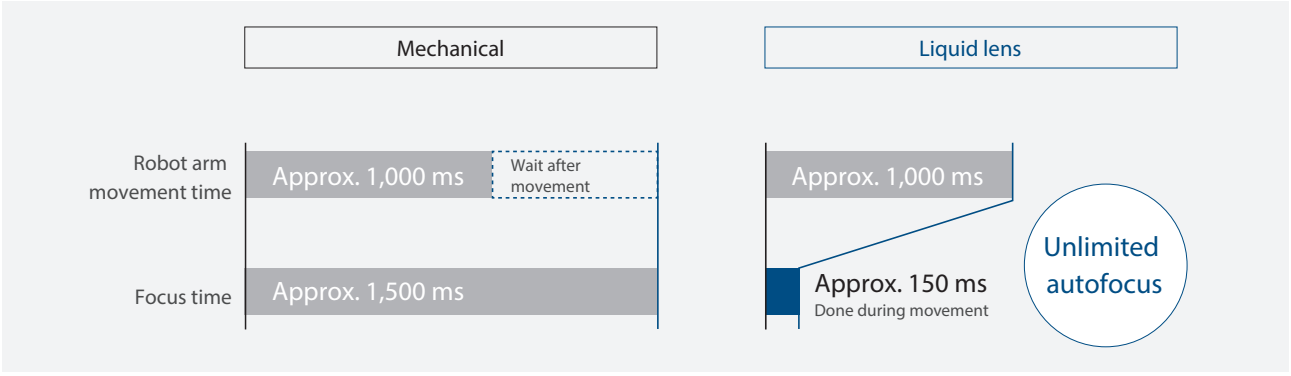
Vision inspection suited to each location

The FHV7 Smart Camera, which is moved to each inspection point, adjusts field of view, precision, and focus to match the location.
External inspection by the human eye can be replaced with automated inspection using robots.



Ultra-high-speed, long-life lens module NEW PATENT PENDING *1

New high-speed lens modules using a liquid lens have been added to the lineup. Advanced control of the liquid lens enables the lens to focus about 10 times faster than a mechanical focus lens, allowing settings to be changed during movement of the robot arm.*2 General mechanical focus mechanisms break due to deterioration of the drive mechanism or motor when they perform autofocus tens of thousands of times. The liquid lens provides unlimited autofocus and long life.

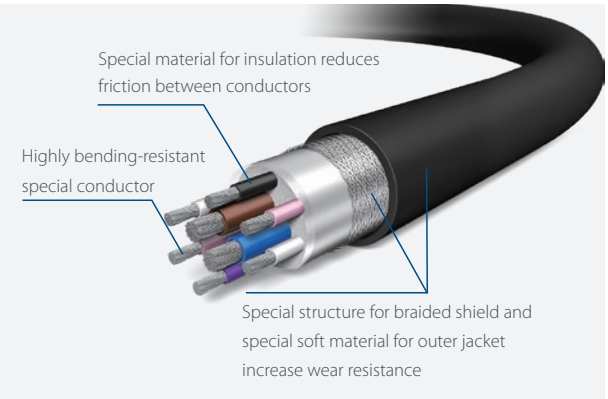


Note: The above times are when the focus value is changed from minimum to maximum. These times are provided for reference only and are not guaranteed.
*1. "Patent pending" means that we applied for a patent in Japan, and "Patented" means that we obtained a patent in Japan. (As of April 2019)
*2. Set focuses for different product heights in advance and switch between them.

Much less maintenance

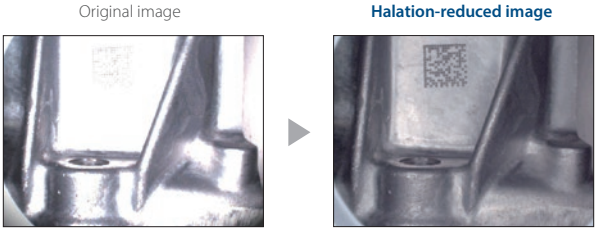
Super-flexible cable NEW

The new cable offers approximately 10 times the bending resistance of conventional FHV7 flexible cables. High bending resistance significantly reduces the frequency of replacing the cables on robot arms.



Reduces halation from metallic or glossy surfaces NEW

The High Dynamic Range (HDR) function minimizes the influence of changes in lighting conditions and light reflection. This enables stable inspections even for materials that are difficult to light evenly, such as metal parts or glossy films, or in locations subject to external light interference.



Halation

Stable detection for metallic surfaces subject to gloss and inconsistent lighting

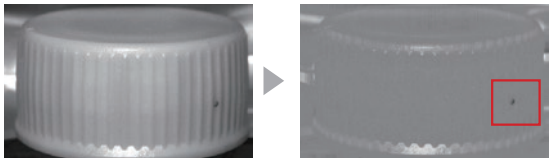
Filtering to emphasize difficult-to-find defects

Image input & filtering **18 processing items**

Stripe Removal Filter II

The stripped pattern is filtered out so that only required aspects are shown clearly. Vertical, horizontal, and diagonal stripes can be removed.

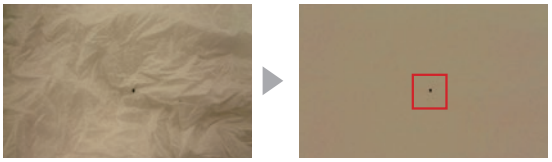
Unfiltered image | **Filtered image**



Anti Color Shading PATENTED *

Specific shades that hide defects are removed so that tiny scratches and dirt can be precisely detected. This advanced filtering was achieved through the Real Color Sensing technology.

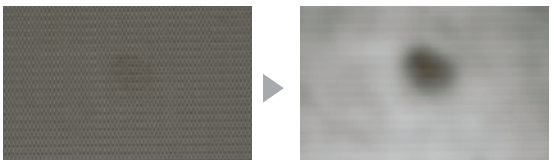
Unfiltered image | **Filtered image**



Even Emphasis Unevenness

This filter removes background pattern and enhances low-contrast unevenness.

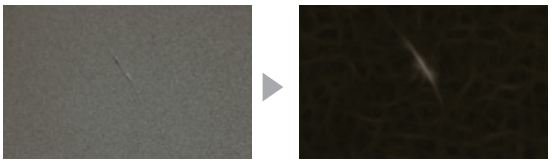
Unfiltered image | **Filtered image**



Emphasis Line Defect/Emphasis Circle Defect

These filters enhance defects in high background noise or scratches on embossed surfaces.

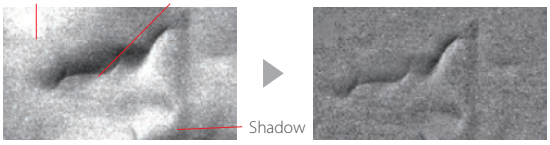
Unfiltered image | **Filtered image**



Brightness Correct Filter

This filter cuts out uneven lighting and changes in brightness caused by workpiece surface irregularities to make characteristic features stand out clearly.

Unfiltered image | **Filtered image**



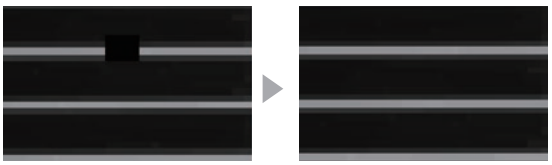
The wavy inconsistencies are judged as defects.

Uneven areas are removed so that only the defect appears in the inspection.

Custom Filter

You can set the mask coefficients as required for these filters. The mask size can be up to 21 x 21. You can flexibly set smoothing, edge extraction, dilation, and erosion for the image.

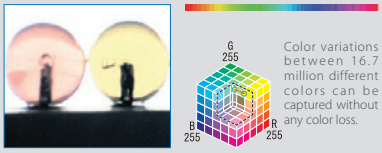
Unfiltered image | **After dilation in one direction**



Real Color Sensing PATENTED *

Real-color processing is an image processing technology that performs high-speed processing of full-color images with a total of 16.7 million colors (256 tones per RGB channel). This means that image processing can be performed with the same color information that is visible to the human eye, and stable measurements can be performed under lighting that closely resembles natural light.

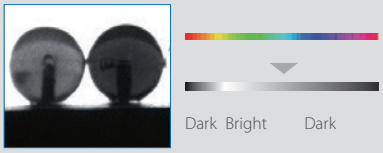
Real Color Sensing



Color variations between 16.7 million different colors can be captured without any color loss.

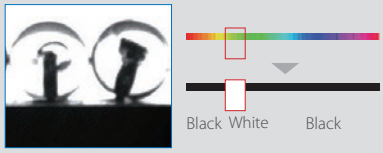
The camera image is processed as-is without any loss of quality. This enables even the slightest of color differences to be captured with high accuracy.

Color image processing



Captured images are converted to a 256-shade monochrome image and processed. This enables more stable inspection compared to binary level processing, but slight changes in color cannot be detected with this method.

Color segmentation processing



Captured images are converted to a black and white two-color image and processed. This reduces the amount of data and enables high-speed processing.

* "Patent pending" means that we applied for a patent in Japan, and "Patented" means that we obtained a patent in Japan. (As of April 2019)

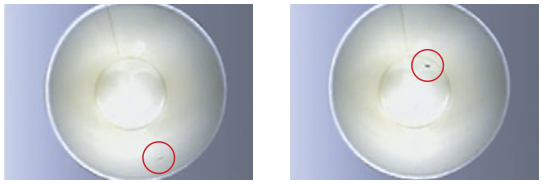
Processing items for various types of inspections

Inspection & measurement **27 processing items**

Precise Defect

Detection of dirt on paper cups

This processing item is used to detect scratches and dirt on paper cups and molded plastics, as well as oil stains on metal surfaces. Real Color Sensing makes it possible to detect dirt in various colors.

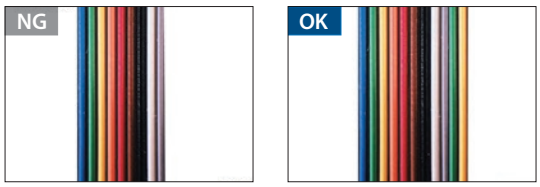


Search II

NEW 2 times faster and higher detection*

Cable arrangement inspection

Just register a model, and the cable arrangement inspection is completed in one go. Repeating color detection is not necessary.

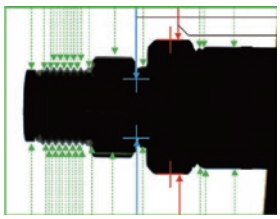


* Compared with Search under our test conditions in April 2019.

Scan Edge Position and Scan Edge Width

Inspection of groove depth of metal shafts

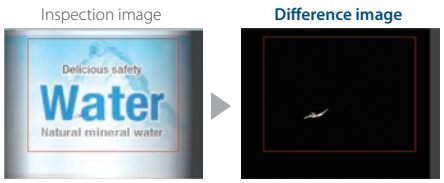
The maximum and minimum widths within the region are measured simultaneously. This processing item is very useful especially for the measurement of groove depths of metal shafts.



Fine Matching

Inspection for label rips

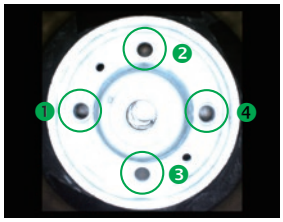
The registered reference image is compared against the input image and tiny differences are detected at high speed. Scratches on the intricate patterns and unexpected dirt in the color are precisely detected.



Labeling

Hole counting

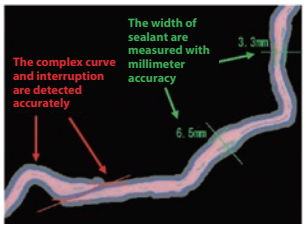
The number of labels with the specified color and size is counted. Also, the area and center of gravity of the specified labels are measured.



Glue Bead Inspection

Path and width inspection

Just define the start and end points of the object to evaluate sealing numerically. This minimizes inconsistencies in inspection. This method enables accurate inspection of complex curves and interruptions.



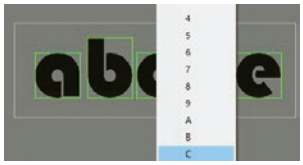
Character Inspection

Label printing inspection

Characters are recognized by pattern search, and this enables special fonts and non-alphanumeric characters to be inspected. Automatically extracting a model and selecting an index from the list help you easily set up your dictionary. Using the user dictionary, the Character Inspection performs pattern search to recognize characters.

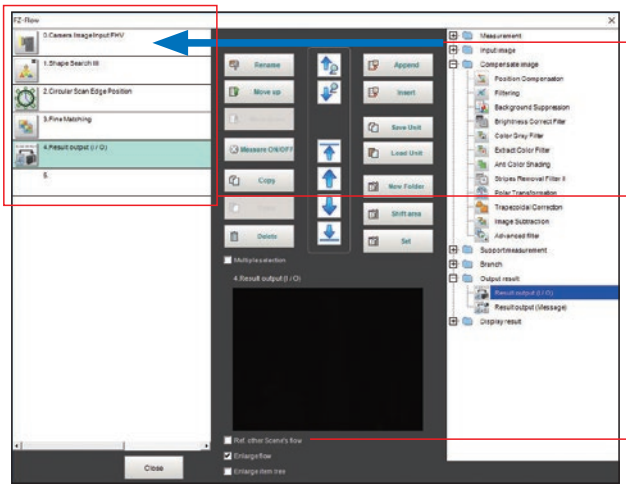
Auto model extraction
(Special fonts can be read)

Index selection from list



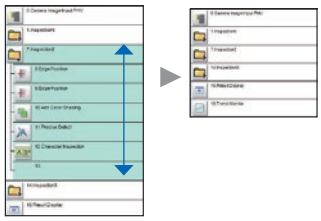
Easy-to-use system with high functionality

Easy measurement flow creation



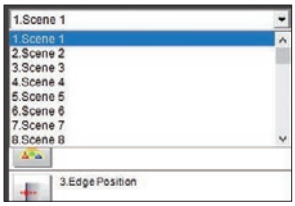
Drag and drop

Just drag and drop pre-installed processing items from the processing item list to the flowchart to build a measurement flow.



Complex and long processes can be grouped into folders.

Copy & paste processing items from other scenes

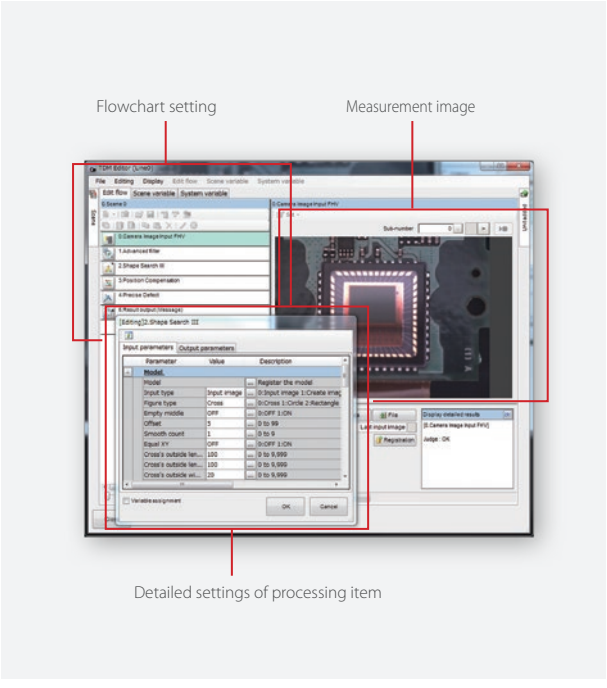


You can set up a new flow menu by combining different processing items copied from other scenes. When reusing the setting of other scenes, you don't need to make adjustments.

Simple setting with menus

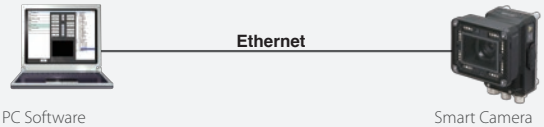
Total Design Management Editor

The design interface allows you to design complex measurement processes while managing variables. This simple GUI manages complicated branching processes and data sharing across measurement scenes and eliminates the need to switch screens.



Setting and operating from a computer

Use a dedicated software to create measurement flows and measurement conditions. The software can also be used for remote monitoring and control via a network.
You can download the software for free after purchasing the product and signing up online. For details, see the member registration sheet attached to the FHV7 Smart Camera.



Operation via touch panel monitor NEW

The Advantech-made touch panel monitor with pre-installed software for the FHV7 Smart Camera can be used as an easy-to-install operator interface.

Touch Panel Monitor
(Advantech)

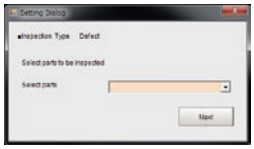
PPC-3100S-OMR

Ask Advantech about the warranty period and coverage of this product.
https://www.advantech.com/contact/offices/

Customizable user interface prevents incorrect operation

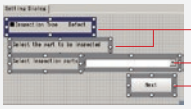
The processing item setting window includes parameters for initial setting and for daily adjustments. To prevent incorrect operation, you can customize the adjustment window to show only parameters that are required for your daily operation.

Example 1: Show only necessary parameters



Example 2: Show a wizard

Easy setting Just select objects from the list in the dialog box and place them. No programming is required.



Label:
Any character string can be displayed in any desired position

Drop-down list: Options can be set

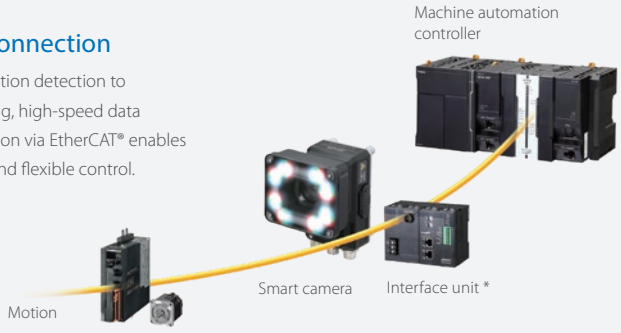
Button:
Operation that is performed when the button is pressed can be set

Easy machine control design NEW

Connecting Sysmac devices via EtherCAT and using the integrated development environment Sysmac Studio allow you to design machine operation as you want.

One Connection

From position detection to positioning, high-speed data transmission via EtherCAT® enables smooth and flexible control.



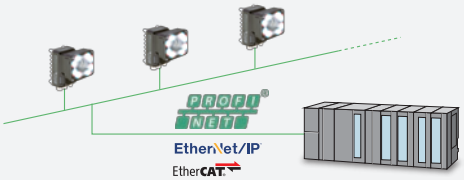
One Software

Programming devices on EtherCAT from the integrated interface reduces setup times.

Easy connection to field networks

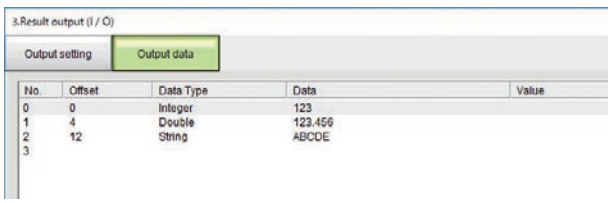
EtherCAT *, EtherNet/IP, PROFINET

The FHV7 Smart Camera includes communication interfaces for compatibility with a wide range of network protocols used at production sites. This helps reduce the design work required for data communications between the camera and a PLC.



Easy setting of output items

Just select variables to output measurement results.



* The FHV-SDU30 EtherCAT Interface is required for EtherCAT connection.

Product lineup

The product lineup includes general-use Smart Cameras and high-speed, high-accuracy vision systems. You can choose the right one according to your requirements for speed and accuracy of each process. Both FH Series and FHV7 Series have the common user interface and operating procedures, so it is possible to share the same image inspection method across the production line. This reduces the time for operator training. The compatibility of setting data enables you to upgrade hardware easily when speed and accuracy enhancement is needed.

✻ For the focal length and horizontal field of view, refer to specifications (P.33) and optical charts of the lens module (P.50)

Lens Modules

Item		Focal length	Model
	High-speed lens module (Autofocus)	6 mm	**FHV-LEM-H06**
		19 mm	**FHV-LEM-H19**
	Standard lens module (Autofocus)	6 mm	**FHV-LEM-S06**
		9 mm	**FHV-LEM-S09**
		12 mm	**FHV-LEM-S12**
		16 mm	**FHV-LEM-S16**
		25 mm	**FHV-LEM-S25**

✻ For the focal length and horizontal field of view, refer to specifications (P.33) and optical charts of the lens module (P.50).
Note: Refer to the *Vision Accessory Catalog* (Cat No. Q198) for details on C-mount lenses.

Lighting Modules

Item	Light color	Model
	Multi color	**FHV-LTM-MC**
	Red	**FHV-LTM-R**
	White	**FHV-LTM-W**
	IR	**FHV-LTM-IR**

Optical Filters

tem			Model
	Polarization Filter	For visible light	**FHV-XPL**
	Polarization Filter	For both infrared light and visible light	**FHV-XPL-IR**
	Diffusion Filter		**FHV-XDF**

Waterproof Hoods

Required to ensure IP67 protection without using a lighting module.

Item		Model
	Waterproof Hood for Lens Modules	**FHV-XHD-LEM**
	Waterproof Hood for C-mount Lens (Short) ✻1	**FHV-XHD-S**
	Waterproof Hood for C-mount Lens (Long) ✻2	**FHV-XHD-L**

✻1. Can be used with the following lenses.
3Z4S-LE SV-0614V, 3Z4S-LE SV-0813V, 3Z4S-LE SV-1214V, 3Z4S-LE SV-1614V, 3Z4S-LE SV-2514V
✻2. Can be used with the following lenses.
3Z4S-LE SV-0614H, 3Z4S-LE SV-0814H, 3Z4S-LE SV-1214H, 3Z4S-LE SV-1614H,
3Z4S-LE SV-2514H, 3Z4S-LE SV-3514H, 3Z4S-LE SV-5014H

Cables

Item		Cable length	Model

		3m	**FHV-VNLBX 3M**
		5m	**FHV-VNLBX 5M**
		10m	**FHV-VNLBX 10M**
	External Light Conversion Cable for MDMC Light	0.1m	**FHV-VFLX-GD**

✻1. The FHV-VDB/VDLB/VDBX/VDLBX I/O Cable cannot be connected when the smart camera data unit is used.
Use the FHV-VUB/VULB/VUBX/VULBX Smart Camera Data Unit Cable.

✻2. The Super Bend Resistant cables (FHV-VN□BX, FHV-VD□BX) do not protect against water.
(If using them, the IP Protection level for the smart camera will not be IP67, but rather IP60.)
If protection against water is required, please use a Bend Resistant cable (FHV-VN□B, FHV-VD□B).

Recommended EtherCAT Communications Cables

Use Straight STP (shielded twisted-pair) cable of category 5 or higher with double shielding (braiding and aluminum foil tape) for EtherCAT.

Cable with Connectors

Item	Appearance	Recommended manufacturer	Cable length (m)	Model

*1 Cables with standard RJ45 plugs are available in the following lengths: 0.2 m, 0.3 m, 0.5 m, 1 m, 1.5 m, 2 m, 3 m, 5 m, 7.5 m, 10 m, 15 m, 20 m. Cables with rugged RJ45 plugs are available in the following lengths: 0.3 m, 0.5 m, 1 m, 2 m, 3 m, 5 m, 10 m, 15 m. For details, refer to the Industrial Ethernet Connectors Catalog (Cat. No. G019).

*2 The lineup features Low Smoke Zero Halogen cables for in-cabinet use and PUR cables for out-of-cabinet use. Although the LSZH cable is single shielded, its communications and noise characteristics meet the standards.

*3 Cables colors are available in yellow, green, and blue.

*4 For details, contact your OMRON representative.

Automation Software Sysmac Studio

Please purchase a DVD and licenses the first time you purchase the Sysmac Studio. DVDs and licenses are available individually. The license does not include the DVD.

Item	Specifications	Number of licenses	Media	Model
Sysmac Studio Standard Edition Ver.1.□□	The Sysmac Studio is the software that provides an integrated environment for setting, programming, debugging and maintenance of machine automation controllers including the NJ/NX-series CPU Units, NY-series Industrial PC, EtherCat Slave, and the HMI. Sysmac Studio runs on the following OS. Windows 7 (32-bit/64-bit version) / Windows 8 (32-bit/64-bit version) / Windows 8.1 (32-bit/64-bit version) / Windows 10 Pro (32/64bit) or Enterprise (32/64bit) *1 This software provides functions of the Vision Edition. Refer to your local OMRON website for details such as supported models and functions.	-- (Media only)	Sysmac Studio (32bit) DVD *2	**SYSMAC-SE200D**
		-- (Media only)	Sysmac Studio (64bit) DVD *2	**SYSMAC-SE200D-64**
		1 license *3	—	**SYSMAC-SE201L**
Sysmac Studio Vision Edition Ver.1.□□ *4	Sysmac Studio Vision Edition is a limited license that provides selected functions required for Vision Sensor FH-series/Smart Camera FHV7-series/FQ-M-series settings.	1 license	—	**SYSMAC-VE001L**

✻1. Model "SYSMAC-SE200D-64" runs on Windows 10 (64bit).
✻2. The same media is used for both the Standard Edition and the Vision Edition.
✻3. Multi licenses are available for the Sysmac Studio (3, 10, 30, or 50 licenses).
✻4. This product is a license only. You need the Sysmac Studio Standard Edition DVD media to install it.

Cable length		2 m		3 m		5 m		10 m		20 m	
Connector type		Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector
Cable type		Bending resistance cable									
Size	Power line	AWG21									
	Others	AWG26									
Outer diameter		9.0±0.3 mm dia.									
Min. bending radius		Fixed use: 54 mm, Sliding use: 72 mm									
Input/Output signals	Input signals	4 signals: STEP, DI 0 to 2									
	Output signals	5 signals: ERROR, OR, BUSY, READY, STGOUT/SHTOUT									
	RS-232C	2 signals: Transmission data, Reception data									
Usage environment	Ambient temperature range	Operating: -30 to +80°C, Storage: -30 to +100°C (with no icing or condensation)									
	Ambient humidity range	Operating & Storage: 0 to 93%RH (With no condensation)									
	Ambient atmosphere	No corrosive gases									
	Vibration tolerance	Oscillation frequency: 10 to 150 Hz, Half amplitude: 0.35 mm, Vibration direction: X/Y/Z, Sweep time: 8 minute/count, Sweep count: 10 times									
	Shock resistance	Impact force: 150 m/s^2, Test direction: 6 directions, three time each (up/down, front/behind, left/right)									
Material		Mold part: Nylon, Thermoplastic polyurethane, Sheath part: PVC									
Weight		Approx. 270 g		Approx. 390 g		Approx. 620 g		Approx. 1200 g		Approx. 2350 g

Cable length		2 m		3 m		5 m		10 m		20 m	
Connector type		Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector
Cable type		Bending resistance cable									
Outer diameter		7.2+0.3 mm dia.									
Min. bending radius		Fixed use: 35 mm, Sliding use: 70 mm									
Usage environment	Ambient temperature range	Operating: -40 to +80°C, Storage: -40 to +100°C (with no icing or condensation)									
	Ambient humidity range	Operating & Storage: 0 to 93%RH (With no condensation)									
	Ambient atmosphere	No corrosive gases									
	Vibration tolerance	Oscillation frequency: 10 to 150 Hz, Half amplitude: 0.35 mm, Vibration direction: X/Y/Z, Sweep time: 8 minute/count, Sweep count: 10 times									
	Shock resistance	Impact force: 150 m/s^2, Test direction: 6 directions, three time each (up/down, front/behind, left/right)									
Material		Mold part: Nylon, Thermoplastic polyurethane, Sheath part: Polyurethane									
Weight		Approx. 210 g		Approx. 240 g		Approx. 310 g		Approx. 380 g		Approx. 730 g	

Super Bending Resistance Cables

Item		FHV-VNBX 2M	FHV-VNLBX 2M	FHV-VNBX 3M	FHV-VNLBX 3M	FHV-VNBX 5M	FHV-VNLBX 5M	FHV-VNBX 10M	FHV-VNLBX 10M
Cable length		2 m		3 m		5 m		10 m	
Connector type		Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector	Straight connector	Right angle connector
Cable type		Super bending resistance cable							
Outer diameter		6.3+0.6 mm dia.							
Min. bending radius		38 mm							
Usage environment	Ambient temperature range	Operating: -30 to +80°C, Storage: -30 to +100°C (with no icing or condensation)							
	Ambient humidity range	Operating & Storage: 0 to 93%RH (With no condensation)							
	Ambient atmosphere	No corrosive gases							
	Vibration tolerance	Oscillation frequency: 10 to 150 Hz, Half amplitude: 0.35 mm, Vibration direction: X/Y/Z, Sweep time: 8 minute/count, Sweep count: 10 times							
	Shock resistance	Impact force: 150 m/s^2, Test direction: 6 directions, three time each (up/down, front/behind, left/right)							
Material		Mold part: Nylon, Thermoplastic polyurethane, Sheath part: Low friction PVC							
Weight		Approx. 170 g		Approx. 220 g		Approx. 330 g		Approx. 590 g	

External Light Junction Cables for MDMC Light

Item		FHV-VFLX-GD
Cable length		0.1 m
Outer diameter		4.0±0.1 mm dia.
Min. bending radius		15 mm
Usage environment	Ambient temperature range	Operating: 0 to +40°C, Storage: -25 to +65°C (with no icing or condensation)
	Ambient humidity range	Operating & Storage: 0 to 93%RH (With no condensation)
	Ambient atmosphere	No corrosive gases
	Vibration tolerance	Oscillation frequency: 10 to 150 Hz, Half amplitude: 0.35 mm, Vibration direction: X/Y/Z, Sweep time: 8 minute/count, Sweep count: 10 times
	Shock resistance	Impact force: 150 m/s^2, Test direction: 6 directions, three time each (up/down, front/behind, left/right)
Material		Shell part: Zinc alloy and Brass, Sheath part: Heat-resistant oilproof polyvinyl chloride
Weight		Approx. 30 g

Material		Mold part: Nylon and Thermoplastic polyurethane, Sheath part: PVC							
Weight		Approx. 200 g		Approx. 280 g		Approx. 440 g		Approx. 860 g	

Touch panel monitor

Model		PPC-3100S-OMR (Advantech)
LCD	Display Type	10.4" TFT LCD (LED backlight)
	Resolution	1,024 × 768
	Luminance	350 cd/m^2
	Contrast Ratio	1,200
	Backlight Lifetime	30,000 hr (min.)
	Touch Type	Capacitive
External Interface	Ethernet	10/100/1,000 Mbps Ethernet × 2
	USB I/F	USB 2.0 × 1, USB 3.0 × 1
Power Consumption	Input Voltage	12 to 24 VDC
	Power Consumption	16 W
Environment	Ambient Temperature Range	Operating: 0 to 50°C Storage: -40 to 60°C
	Ambient Humidity Range	10% to 95% at 40°C (With no condensation)
	Vibration	Operating Random Vibration Test 5 to 500 Hz, 2 Grms, follow IEC 60068-2-64
	Shock	Operating 10 G peak acceleration (11 ms duration), follow IEC 60068-2-27
	EMC	CE, FCC Class B, BSMI
	Safety	CB, CCC, BSMI, UL
Dimensions		272 × 217 × 46 mm
Weight		1.9 kg
Front Panel Protection		IP65 compliant
Mounting		Panel mount, VESA mount, Wall mount
Accessories		Instruction sheet, Connector for power supply, Mounting screws and brackets for panel mount

EtherCAT Communications Specifications

Item		Specifications
Communications standard		IEC61158 Type 12
Physical layer		100 BASE-TX (IEEE802.3)
Modulation		Base band
Baud rate		100 Mbps
Topology		Depends on the specifications of the EtherCAT master.
Transmission Media		Twisted-pair cable of category 5 or higher (double-shielded straight cable with aluminum tape and braiding)
Transmission Distance		Distance between nodes: 100 m or less
Node address setting		00 to 99
External connection terminals		RJ45 × 2 (shielded) IN: EtherCAT input data, OUT: EtherCAT output data
Send/receive PDO data sizes	**Input**	56 to 280 bytes/line (including input data, status, and unused areas) Up to 8 lines can be set. *
	Output	28 bytes/line (including output data and unused areas) Up to 8 lines can be set. *
Mailbox data size	**Input**	512 bytes
	Output	512 bytes
Mailbox		Emergency messages, SDO requests, and SDO information
Refreshing methods		I/O-synchronized refreshing (DC)

* This depends on the upper limit of the master.

Version Information

FHV7 Series and Programming Devices

Use the latest version of Sysmac Studio Standard Edition/Vision Edition.

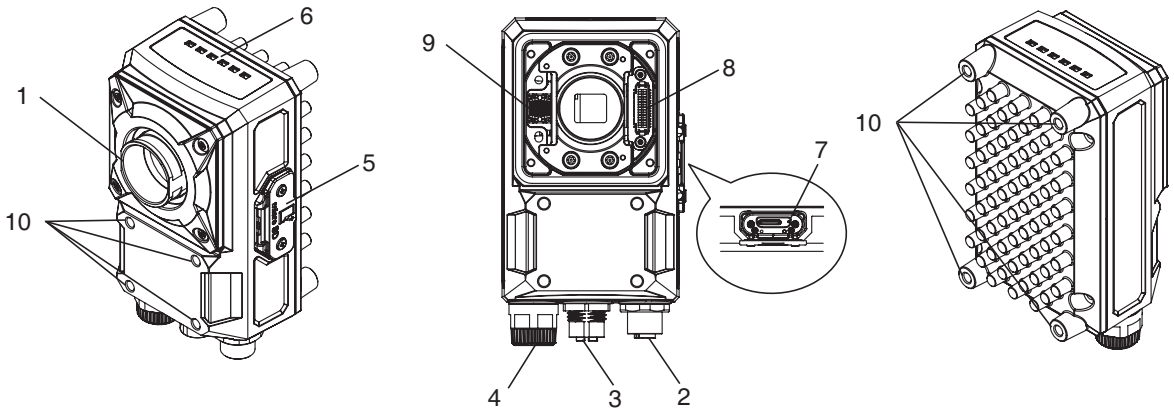
Version of FHV7 Series	Corresponding version of Sysmac Studio Standard Edition/Vision Edition
Ver.6.30 or higher	Supported by version 1.29 or higher.

Recommended Operational Environment for Remote Operation Tool

Name	Description
CPU	Intel Pentium Processor (SSE2 or higher)
OS	• Windows 7 Professional (32/64-bit) or Enterprise (32/64-bit) or Ultimate (32/64-bit) • Windows 10 Pro (32/64-bit) or Enterprise (32/64-bit)
Memory	2GB (3GB or more recommended)
Hard disk space	2GB or more
Display	Resolution: 1280 x 1240 dots or more Color: True Color (32-bit)
Network	10BASE-T (100BASE-TX recommended)

Using the FH/FHV Launcher requires Microsoft .NET Framework 3.5 installed.

Parts and Names



No.	Name		Description
1	Imaging unit		Captures images.
2	Connector for I/O cable/Smart camera data unit cable		Use this connector when connecting the smart camera with its power supply or an external device using an I/O cable. Moreover, use this when connecting the smart camera with its data unit using its data unit cable. Dedicated I/O cable: FHV-VD□ Dedicated smart camera data unit cable: FHV-VU□
3	Connector for Ethernet cable		Use this connector when connecting the smart camera with a personal computer and so on using an Ethernet cable. Dedicated Ethernet cable: FHV-VN□□
4	Connector for external lighting		Use this connector when connecting an external lighting and the external lighting controller. Connectable external lighting controller: FL-TCC□ and FLV-TCC□ Connectable external light: FL-MD□MC
5	Connector to attach microSD card		Use this connector to attach a microSD card. Do not extract/insert the microSD card during processing. Otherwise, measurement time may be influenced or data may be broken.
6	Operation indicator	PWR (Green)	Lights while power is supplied.
		RUN (Green)	Lights when switching to the layout in which the RUN signal output is set ON.
		LINK (Yellow)	Lights when connected with Ethernet equipment and blinks during communication.
		BUSY (Green)	Lights while processing is in progress.
		OR (Yellow)	Lights when the overall judgment output signal is ON.
		ERR (Red)	Lights when an error occurs.
7		SD ACCESS (Yellow)	Lights when accessing to the microSD card.
8	Connector for lighting module (White)		Use this connector when mounting the lighting module.
9	Connector for lens module (Black)		Use this connector when mounting the lens module.
10	Mounting screw holes		Recommended tightening torque: 2.3N·m

Processing Items

Group	Icon	Processing Item	
Measurement		Search	Used to identify the shapes and calculate the position of measurement objects.
		Search Ⅱ	Even if the Search processing item cannot detect a model, the Search II can stably detect it by creating the optimal model according to the size and rotation of the measurement object.
		Flexible Search	Recognizing the shapes of workpieces with variation and detecting their positions.
		Sensitive Search	Search a small difference by dividing the search model in detail, and calculating the correlation.
		Shape Search Ⅲ	Robust detection of positions is possible at high-speed and with high precision incorporating environmental fluctuations, such as differences in individual shapes of the workpieces, pose fluctuations, noise superimposition and shielding.
		Classification	Used when various kinds of products on the assembly line need to be sorted and identified.
		Edge Position	Measure position of measurement objects according to the color change in measurement area.
		Edge Pitch	Detect edges by color change in measurement area. Used for calculating number of pins of IC and connectors.

Group	Icon	Processing Item	
Measurement		Scan Edge Position	Measure peak/bottom edge position of workpieces according to the color change in separated measurement area.
		Scan Edge Width	Measure max/min/average width of workpieces according to the color change in separated measurement area.
		Circular Scan Edge Position	Measure center axis, diameter and radius of circular workpieces.
		Circular Scan Edge Width	Measure center axis, width and thickness of ring workpieces.
		Intersection	Calculate approximate lines from the edge information on two sides of a square workpiece to measure the angle formed at the intersection of the two lines.
		Color Data	Used for detecting presence and mixed varieties of products by using color average and deviation.
		Gravity and Area	Used to measure area, center of gravity of workpices by extracting the color to be measured.
		Labeling	Used to measure number, area and gravity of workpieces by extracting registered color.
		Precise Defect	Check the defect on the object. Parameters for extraction defect can be set precisely.

Group	Icon	Processing Item	
Measurement		Fine Matching	Difference can be detected by overlapping and comparing (matching) registered fine images with input images.
		Character Inspect	Recognize character according correlation search with model image registered in [Model Dictionary].
		Date Verification	Reading character string is verified with internal date.
		Model Dictionary	Register character pattern as dictionary. The pattern is used in [Character Inspection].
		2DCode II *1	Recognize 2D code and display where the code quality is poor.
		2DCode *2	Recognize 2D code and display where the code quality is poor.
		Barcode *3	Recognize barcode, verify and output decoded characters.
		OCR	Recognize and read characters in images as character information.
		OCR User Dictionary	Register dictionary data to use for OCR.
		Glue Bead Inspection	You can inspect coating of a specified color for gaps or runoffs along the coating path.
Input Image		Camera Image Input FHV	To input images from cameras. And set up the conditions to input images from cameras. (For FHV only)
		Camera Image Input HDR	Create high-dynamic range images by acquiring several images with different conditions.
		Measurement Image Switching	To switch the images used for measurement. Not input images from camera again.
		Multi-trigger Imaging	The Multi-trigger Imaging processing item captures multiple images at user-defined timings and executes parallel measurement for each image. Insert the Multi-trigger Imaging to the top of the flow.
		Multi-trigger Imaging Task	The Multi-trigger Imaging processing item captures multiple images at user-defined timings and executes parallel measurement for each image. Insert this processing item to the top of the processing which requires imaging for multiple times.
Compensate image		Position Compensation	Used when positions are differed. Correct measurement is performed by correcting position of input images.
		Filtering	Used for processing images input from cameras in order to make them easier to be measured.
		Background Suppression	To enhance contrast of images by extracting color in specified brightness.
		Brightness Correct Filter	Track brightness change of entire screen and remove gradual brightness change such as uneven brightness.
		Color Gray Filter	Color image is converted into monochrome images to emphasize specific color.
		Extract Color Filter	Convert color image to color extracted image or binary image.
		Anti Color Shading	To remove the irregular color/pattern by uniformizing max.2 specified colors.
		Stripes Removal Filter Ⅱ	Remove the background pattern of vertical, horizontal and diagonal stripes.
		Polar Transformation	Rectify the image by polar transformation. Useful for OCR or pattern inspection printed on circle.
		Trapezoidal Correction	Rectify the trapezoidal deformed image.
		Image Subtraction	The registered model image and measurement image are compared and only the different pixels are extracted and converted to an image.
		Advanced filter	Process the images acquired from cameras in order to make them easier to measure. This processing item consolidates existing image conversion filtering into one processing item and adds extra functions.
Support measurement		Calculation	Used when using the judge results and measured values of ProcItem which are registered in processing units.
		Line Regression	Used for calculating regression line from plural measurement coodinate.
		Circle Regression	Used for calculating regression circle from plural measurement coordinate.
		Precise Calibration	Used for calibration corresponding to trapezoidal distortion and lens distortion.
		Trend Monitor	Used for displaying the information about results on the monitor, facilitating to avoid NG and analyze causes.
		Image Logging	Used for saving the measurement images to the memory and USB memory.
		Image Conversion Logging	Used for saving the measurement images in JPEG and BMP format.
		Elapsed Time	Used for calculating the elapsed time since the measurement trigger input.
		Wait	Processing is stopped only at the set time. The standby time is set by the unit of [ms].

Group	Icon	Processing Item	
Support measurement		Parallelize	A part of the measurement flow is divided into two or more tasks and processed in parallel to shorten the measurement time. This processing item is placed at the top of processing to be performed in parallel.
		Parallelize Task	A part of the measurement flow is divided into two or more tasks and processed in parallel to shorten the measurement time. This processing item is placed immediately before processing to be performed in parallel between Parallelize and Parallelize End.
		Statistics	Used when you need to calculate an average of multiple measurement results.
		Reference Calib Data	Calibration data and distortion compensation data held under other processing items can be referenced.
		Position Data Calculation	The specified position angle is calculated from the measured positions.
		Stage Data	Sets and stores data related to stages.
		Robot Data	Sets and stores data related to robots.
		Vision Master Calibration	This processing item automatically calculates the entire axis movement amount of the control equipment necessary for calibration.
		Convert Position Data	The position angle after the specified axis movement is calculated.
		Movement Single Position	The axis movement that is required to match the measured position angle to the reference position angle is calculated.
		Movement Multi Points	The axis movements that are required to match the measured position angles to the corresponding reference position angles are calculated.
		Camera Calibration	By setting the camera calibration, the measurement result can be converted and output as actual dimensions.
		Scene	The specified scene is copied to the current scene.
		System Information	Obtain system information (e.g., memory and disk space and I/O input signal status) of the Sensor Controller.
Branch		End	This ProcItem must be set up as the last processing unit of a branch.
		Conditional Execution (If)	The measurement flow is divided according to the comparison result obtained using the set expressions and conditions.
		Conditional Execution (Else)	Insert between the Conditional Execution (If) processing item and End If processing item. The measurement flow is divided according to the comparison result obtained using the set expressions and conditions.
		Loop	The set processes are repeated until the loop count reaches the specified number, and then the next process starts.
		Loop Suspension	Insert between the Loop processing item and End Loop processing item. Used to stop the loop before the loop count reaches the specified number.
		Select Execution (Select)	Used to set conditions. The measurement flow is divided according to the comparison result obtained using the conditions given by expressions.
		Select Execution (Case)	Used to make a judgment. The measurement flow is divided according to the comparison result obtained using the conditions given by expressions.
Output result		Result Output (I/O)	Output data to the external devices such as a programmable controller or a PC via PLC Link, Fieldbus interface (EtherCAT ✻4, EtherNet/IP (other than message communication), PROFINET).
		Result Output (Message)	Output data to the external devices such as a programmable controller or a PC with non-procedure mode via Ethernet or RS-232C. This processing item allows you to save the logging data as a ".csv" file into the Sensor Controller as well.
		Result output (Parallel I / O)	Output measurement results and/or judgment results to the external devices such as a programmable controller or a PC via Parallel interface ✻5.
Display result		Result Display	Used for displaying the texts or the figures in the camera image.
		Display Last NG Image	Display the last NG images.
		Display Image Hold	Processing item to retain images, including measurement results.

*1 2D Codes that can be read : Data Matrix (ECC200)
*2 2D Codes that can be read : Data Matrix (ECC200), QR Code
*3 Bar Codes that can be read : JAN/EAN/UPC (including add-on codes), Code 39, Codabar (NW-7), ITF (Interleaved 2 of 5), Code 93, Code 128, GS1-128, GS1 DataBar (RSS-14 / RSS Limited / RSS Expanded), Pharmacode
*4 The FHV-SDU30 EtherCAT Interface is required for EtherCAT connection.
*5 The FHV-SDU10 Parallel Interface is required for Parallel I/O connection.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Note: Do not use this document to operate the Unit.
