

Micrometer Setting Standard

Item number: 167-148

Images

Description

A Mitutoyo precision length standard for accurately setting a micrometer at the start or end of its measuring range. Can also be used for setting other types of continuous-scale measuring instruments at a certain point within the measuring range when wishing to use the narrow-range accuracy capabilities of that instrument.

Features

| | |
|-----------------|------------------|
| Delivered: | In a carton box |
| Inch-Metric: | Inch |
| Length (L): | 8" |
| Diameter (D): | 0.37" |
| Accuracy: | ±0,00015" |
| Flatness: | 0,000012" |
| Parallelism: | 0,00008" |
| Measuring face: | Micro-lap finish |
