

Micrometer Setting Standard

Item number: 167-149

Images

Description

A Mitutoyo precision length standard for accurately setting a micrometer at the start or end of its measuring range. Can also be used for setting other types of continuous-scale measuring instruments at a certain point within the measuring range when wishing to use the narrow-range accuracy capabilities of that instrument.

Features

Delivered:	In a carton box
Inch-Metric:	Inch
Length (L):	9"
Diameter (D):	0.37"
Accuracy:	±0,0002"
Flatness:	0,000012"
Parallelism:	0,00008"
Measuring face:	Micro-lap finish
