

Images

- It is constructed from an assembly of five highly accurate, steel or ceramic gauge blocks.
- Each adjacent step is calibrated to a resolution of $0.01\text{ }\mu\text{m}$ by using an interferometer with an accuracy tolerance of $\pm 0.2\text{ }\mu\text{m}$.

Inch-Metric:	Metric
Block step:	300, 100, 50, 20 μm
Material:	Steel
Delivered:	In a wooden case with JCSS calibration certificate
Mass:	0.15 kg
