

Automatic Gauge Block Comparator

Item number: 565-172

Images

Description

Series 565

- It performs gauge block calibration according to EN ISO 3650
- Measures the length of rectangular gauge blocks in the size range 0.5 mm to 100 mm. It automatically compares a test block with an appropriate reference gauge block.
- The compensation result is not affected by any warping of thinner gauge blocks due to the use of upper and lower gage heads (dual-head system).
- Measurement configuration: 1 cycle of automatic comparison measurement with a standard gauge block.

Specification

Model:	GBCD-100A
Delivered:	Without Software GB-Pak

Accessories

Optional accessories:

Software GB-PAK-A, Vers. 4X
